

February 27, 2025. Moscow. Sberbank (hereafter — «the Group» or «Sber» published Summary Consolidated Financial Statements under International Financial Reporting standards (IFRS) (hereafter «the Financial Statements») for 12M 2024 and as of December 31, 2024.

Sber net profit for 12M 2024 reached RUB1 580.3 bn in accordance with International Financial Reporting Standards (IFRS)

Herman Gref, Chairman of the Executive Board, CEO, stated:

“Today, we release Sber Group results for 2024: net profit amounted to RUB1580.3 bn and grew by 4.8% year-on-year, while the return on equity stood at 24.0%. At the start of the year, we set ambitious financial goals, all of them were achieved, despite major shifts in the external environment.

The corporate loan portfolio increased by 19% over the year and exceeded RUB27.7 trn. The retail portfolio grew at a slower pace under the pressure of high interest rates and tighter regulation, adding 12.7% from the beginning of the year to RUB18.1 trn. Client funds surpassed RUB44.6 trn, reflecting a 21.6% rise. Despite high inflation and rising wages, in 2024 we managed to keep cost to income ratio at 30.3% – close to the bottom of the forecasted range.

Last year marked an important milestone in the transformation of our business model into a human-centric company, with artificial intelligence being the key driver of these changes. As one of the first companies to embark on AI transformation, we have already moved to a platform-based bigtech landscape, rebuilt the architecture, based on our own technologies, and ensured vendor-independence for our key processes. Our next goal is to integrate AI agents and move from assistance to autonomy, enabling us to radically change the way we interact with our clients and pave the way for a hyperpersonalized client experience. This is a real challenge, but this strategic shift will ensure both our leadership and long-term sustainability.”

Technological Leadership

Continuous technological advancement remains our top priority. In 2024, we took important steps aimed at strengthening our position in advanced technologies.

- Sber launched the largest and smartest model in the family – **GigaChat MAX**.
 - The number of unique GigaChat users reached 7 mn people who made 170 mn requests.
 - More than 9,000 external clients are already applying GigaChat. The neural network helps them solve business tasks using cutting-edge technologies that also work for the benefit of the state.
- **GigaCode** accelerates the coding process by suggesting the most likely code continuations in real-time within the development environment.
 - Development speed has been increased by more than 25% thanks to GigaCode.
 - About 40% of developers' code is created with the help of GigaCode, and the number of service users exceeds 20 ths.
- Initiatives for vendor replacement continue to be implemented.
 - Sber fully transitioned to using the domestic product **Platform V SOWA** in security gateways, which reduces the total cost of ownership compared to foreign hardware-software complexes up to 28 times.
- Migration to the proprietary processing platform based on **Platform V DataGrid** and **Platform V Pangolin** for handling financial transactions has been successfully completed.
- Sber expanded its lineup of **smart devices** by introducing new TV models, an updated SberBox 2 set-top box, and smart speakers SberBoom Home and SberBoom Mini: overall in 2024, 1.9 mn smart devices were sold.
- In December, Sber released **Kandinsky 4.0** – a next-generation neural network for creating realistic videos based on text descriptions or starting frames, as well as audio accompaniment for generated videos.
 - The user base has exceeded 15 mn people, and the number of requests has surpassed 600 mn generations.
- Sber established the "AI for Science" center. The goal of the center is to create an AI tool that will significantly enhance researchers not only within Sber but across the entire country. This will help domestic scientists make discoveries and breakthroughs more frequently—both in fundamental and applied science.

Sustainability

We actively promote initiatives in sustainable development and offer innovative solutions in this area for our clients and partners.

- Sber responsible finance portfolio reached RUB3.77 trn in the 4Q 2024 (+30% YoY), of which 81% consists of ESG loans.
